www.sulunarms.com / info@sulunarms.com

*S*ulün Arms is a shotgun manufacturer that was founded in 1965 in the Beysehir/Üzümlü district of Konya, Turkey. We were only servicing local clients in Turkey in the early days of establishment. Our founder, Adem Çetindede, started to manufacture various kinds of shotguns by combining skills and knowledge accumulated through vast experience in shotgun sector coupled with new technology and manufacturing expertise. In 2018 we have not slowed down, providing our clients with some of the highest quality firearm products incorporating leading edge and exclusive technology. Now, we are proud to distribute our Turkish firearm products all across the world.

Sulün Arms specialize in shotgun technology including various types of shotguns and air rifles. We also produce spare parts and support the development of the shotgun industry, with many exciting new products to be released to market in the near future.

Since the day it was founded, our company, which focuses on R&D work, has pioneered a brand new technology. We have developed, tested and introduced to the media exclusive bio-metrically secured (fingerprint activated) technology at 2017 Prohunt Exhibition in Istanbul, which is featured in some of our Shotgun models. This will bring increased security preventing the firearm from discharging by unintended users, such as would-be thieves or children.

We strive to be the leader in our field, providing the best quality and service to our valued customers in the best possible way. We invite you to experience Sulün Arms quality and expertise, and see for yourself by getting your hands on one of our fantastic firearms!

LEVER ACTION

THE FIRST SHOTGUN WORKING WITH THE FINGERPRINT SYSTEM ONE THE WHOLE WORLD.

Technical specification:

- 1- With the fingerprint defined, it serves only its own user.
- 2- The shotguns operates only when the fingerprint holder's hand touches the stock.
- 3- If for any reason the user's hand contact is cut off from the stock, the automatic lock is activated.
- 4- For a fingerprint system, the number of users can be set from 1 to 10.
- 5- This system can optionally be added to GPS. In this way, you can follow your gun any where in the world.
- 6- This system has a rechargeable battery unit.
- 7- This system has a standby time of 60 hours.

Shotguns to which this system can be adapted:
This system is suitable for all SHOTGUN and RIFLES
that do not have tactical or wooden stock.
